SUMMARY

Results-driven Data Scientist and Software Developer with 5+ years of professional experience developing data-driven applications, machine learning solutions, and software systems. Experienced in Python, R, SQL, cloud technologies, APIs, and modern AI/ML frameworks. Strong ability to work in international, multicultural environments and translate complex technical requirements into practical business solutions.

EDUCATION

European/UK University

MSc Information Technology, Relevant areas: Software Development, Artificial Intelligence, Data Management, 2024 – 2025
Cloud Computing, Information Systems.

University Name

BSc Computer Science / Information Technology, Relevant areas: Programming, Databases, Software Engineering, Computer Networks, Algorithms and Data Structures. 2014 – 2018

EXPERIENCE

Senior Data Scientist / Software Developer

January 2023 – Present

Tech Solutions Europe Ltd

London, UK

- Develop machine learning and AI solutions for data-driven business applications.
- Design and deploy Python and R applications using modern cloud infrastructure.
- Build REST APIs and integrate third-party AI and data services.
- Develop interactive data applications and dashboards for business users.
- Work with cross-functional teams to translate business requirements into technical solutions.
- Implement automated data processing and machine learning workflows.
- Use Git and collaborative development practices to manage production code.
- Contribute to technical documentation, code reviews, testing, and system optimisation.

Data Scientist

June 2020 – December 2022

European Analytics Group

Manchester, UK

- Analysed large datasets to identify trends, patterns, and actionable insights.
- Developed predictive machine learning models using Python and R.
- Created interactive dashboards and visualisations for technical and non-technical stakeholders.
- Designed data pipelines for cleaning, transforming, and analysing structured datasets.
- Built statistical and machine learning models to support business decision-making.
- Presented analytical findings to stakeholders and provided recommendations based on data.
- Collaborated with software engineers and analysts on data-intensive projects.

Junior Data Analyst / Developer

September 2018 – May 2020

Digital Analytics Solutions

Birmingham, UK

- Prepared and analysed datasets using SQL, Python, and R.
- Developed automated reports and data visualisations.
- Assisted with the development and testing of internal software applications.
- Cleaned and transformed data from multiple sources.
- Supported senior analysts with statistical analysis and reporting.
- Documented analytical processes and contributed to team knowledge sharing.

PROJECTS

AI-Powered Data Analysis Platform | Developed an AI-enabled application that allows users to interact with datasets using natural-language questions. Integrated an LLM API with data-processing and visualisation components.

Machine Learning Deployment Platform | Built and deployed machine learning applications using Python, Docker, Google Cloud, and serverless cloud infrastructure.

Interactive Data Applications | Developed interactive applications and dashboards using R Shiny, enabling users to explore datasets and generate data-driven insights.

TECHNICAL SKILLS

Programming: Python, R, SQL, JavaScript, HTML, CSS

Data Science: Machine Learning, Statistical Analysis, Data Visualisation, Predictive Modelling

AI/ML: Generative AI, Large Language Models, NLP, Deep Learning

Cloud: Google Cloud Platform, Cloud Run, Cloud Storage, Serverless Technologies

Software Development: REST APIs, Git, Docker, Node.js, Shiny

Databases: PostgreSQL, Supabase, MySQL

Tools: GitHub, Jupyter, RStudio, Google Colab

Professional: Problem Solving, Communication, Teamwork, Technical Documentation

CERTIFICATIONS

Google Cloud / Cloud Computing

Machine Learning and Artificial Intelligence

Data Science and Analytics

Python Programming

Software Development and APIs

TECHNICAL PROJECTS & OPEN SOURCE

GitHub: github.com/johndoe

Selected areas of work: - Machine learning applications - Data science projects - AI and LLM applications - R Shiny applications - Cloud deployment - REST API development

LANGUAGES

English: Fluent / Professional Additional European Language: Intermediate

PROFESSIONAL ATTRIBUTES

- Strong analytical and problem-solving skills - Excellent written and verbal communication - Comfortable working independently and within international teams - Strong attention to detail - Adaptable and quick to learn new technologies - Experienced working in multicultural professional environments
