SUMMARY

Results-driven Data Scientist and Software Developer with 5+ years of professional experience developing data-driven applications, machine learning solutions, and software systems. Experienced in Python, R, SQL, cloud technologies (GCP), APIs, and modern AI/ML frameworks including generative AI. Strong ability to work in international, multicultural environments and translate complex technical requirements into practical business solutions.

TECHNICAL SKILLS

Programming:	Python, R, SQL, JavaScript, HTML, CSS
Cloud:	Google Cloud Platform, Cloud Run, Cloud Storage, Serverless Technologies
Data Science & Engineering:	Machine Learning, Statistical Analysis, Data Visualisation, Predictive Modelling, ETL Pipeline Development, Data Modelling
AI/ML:	Generative AI, Large Language Models, NLP, Deep Learning
Software Development:	REST APIs, Git, Docker, Node.js, CI/CD, Version Control
Databases:	PostgreSQL, Supabase, MySQL
Tools:	GitHub, Jupyter, RStudio, Google Colab
Professional:	Problem Solving, Communication, Teamwork, Technical Documentation

EXPERIENCE

Senior Data Scientist / Software Developer

January 2023 - Present

Tech Solutions Europe Ltd | London, UK

- Deploy machine learning models to production and implement AI solutions for data-driven business applications.
- Design and implement data flows and deploy Python and R applications using modern cloud infrastructure.
- Build REST APIs and integrate third-party AI and data services connecting operational and analytics systems.
- Develop interactive data applications and dashboards for business users and BI.
- Work with cross-functional teams to translate business requirements into technical solutions and effectively explain complex technical solutions to a non-technical audience.
- Build processes supporting data transformation, data processing and machine learning workflows.
- Use Git and collaborative development practices to manage production code and deliver code, unit tests, and integration tests.
- Contribute to technical documentation, code reviews, testing, and system optimisation.

Data Scientist

June 2020 - December 2022

European Analytics Group | Manchester, UK

- Navigate, explore, query and analyse large datasets to identify trends, patterns, and actionable insights.
- Developed predictive machine learning models using Python and R and implemented measures to monitor their performance.
- Created interactive dashboards and visualisations for technical and non-technical stakeholders.
- Designed and iterated data mappings and data pipelines for cleaning, transforming, and analysing structured datasets.
- Built statistical and machine learning models to support business decision-making.
- Presented analytical findings to stakeholders, delivering impactful presentations articulating key points clearly.
- Collaborated with software engineers and analysts on data-intensive projects.

Junior Data Analyst / Developer

September 2018 - May 2020

Digital Analytics Solutions | Birmingham, UK

- Prepared, explored and queried datasets using SQL, Python, and R.
- Developed automated reports and data visualisations.
- Assisted with the development and testing of internal software applications.
- Identified and resolved data issues, cleaned and transformed data from multiple sources.
- Supported senior analysts with statistical analysis and reporting.

- Documented analytical processes to deliver clear information and guidance, contributing to team knowledge sharing.

PROJECTS & OPEN SOURCE

AI-Powered Data Analysis Platform | Developed an AI-enabled generative AI application that allows users to interact with datasets using natural-language questions. Integrated an LLM API with data-processing and visualisation components.

Machine Learning Deployment Platform | Built and deployed machine learning applications using Python, Docker, Google Cloud, and serverless cloud infrastructure.

Interactive Data Applications | Developed interactive applications and dashboards using R Shiny, enabling users to explore datasets and generate data-driven insights.

EDUCATION

European/UK University	2024 - 2025
<i>MSc Information Technology</i>	
Relevant areas: Software Development, Artificial Intelligence, Data Management, Cloud Computing, Information Systems.	
University Name	2014 - 2018
<i>BSc Computer Science / Information Technology</i>	
Relevant areas: Programming, Databases, Software Engineering, Computer Networks, Algorithms and Data Structures.	

CERTIFICATIONS

Google Cloud / Cloud Computing | Machine Learning and Artificial Intelligence | Data Science and Analytics | Python Programming | Software Development and APIs

PROFESSIONAL ATTRIBUTES

Strong analytical and critical thinking skills - Excellent written and verbal communication - Comfortable working independently and within international teams - Strong attention to detail - Adaptable and quick to learn new technologies

- Experienced working in multicultural professional environments
